

Tantrum Baby

What happens when you tell this little kid “No”?

Think Like an Engineer:

How can you make a doll have “tantrum”?

Think Like an Artist:

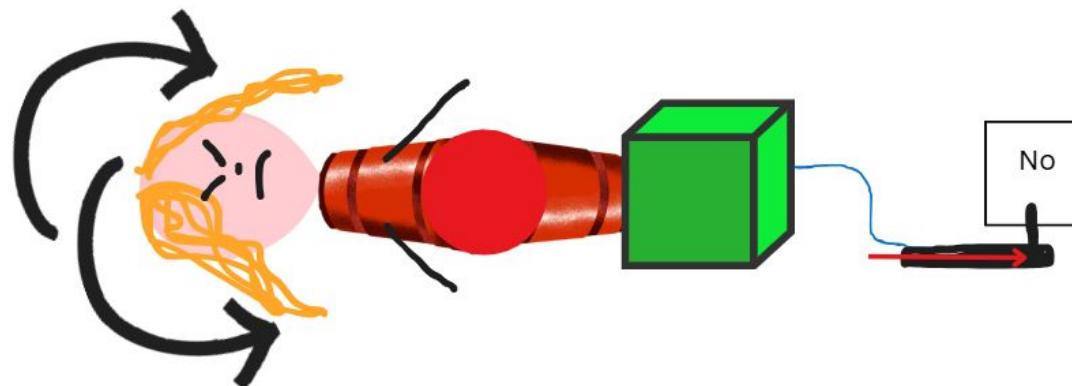

What materials will you use to add features to your doll to make it come to life?

EXAMPLE IDEAS

Use a balloon for the kid’s head. Attach the balloon to recycled plastic cups or a jug secured with tape.

Decorate the head with yarn for hair and draw on a face.

Use a grove-slide potentiometer to choose when the kid flails back and forth.
